

Save With Energy Star

Energy Star appliances save you money in operating costs during the life of the appliance. Check out www.energystar.gov to learn more.

Get Your Incentive

Members are always welcome to call SVE in advance of their purchase to verify appliance eligibility. Once the appliance is bought, send a copy of the receipt, including the unit model number, to SVE. Receipts also are required for irrigation incentives.

Energy-Efficiency Incentives

Incentives for installing residential and agricultural energy-efficiency measures.

Energy-Efficiency Incentives

Surprise Valley Electrification Corp. offers member incentives for installing energy-efficiency measures in their homes and agricultural systems.

Residential incentives include free compact fluorescent lights and water heater wraps.

In the field, agricultural irrigation hardware improvements, such as installation or replacement of pressure regulators, nozzles, sprinklers and gaskets, qualify for incentives.

SVE continues to provide pump tests at no cost to its members.

Please contact SVE Member Service Manager Lynn Culp with questions about residential efficiency incentives; if you have an agricultural project you believe is eligible for an incentive; or to schedule a pump test of your system. Please note that incentives may change without notice.

Agricultural Incentives

Freeze-resistant stock water tanks/fountains	\$165
Center pivot boot gasket	\$175/pivot
Low pressure regulator—pivot	\$5/regulator
Rotating type sprinklers—pivot	\$4/sprinkler
New nozzle—pivot	\$1/nozzle
Multi-trajectory spray —replace impact	\$4/sprinkler
Drop tube—pivot	\$3/drop
Goose neck elbow—pivot	\$1.65/elbow
Rebuilt/new brass sprinkler	\$3.75 each
Flow control nozzle	\$4/nozzle
Impact sprinkler replacement	\$3.75 each
New hubs for wheel-lines	\$14.50/hub
Impact sprinkler nozzle	\$1.50 each
Portable main/wheel/hand line gasket replacement	\$2.75/gasket
New drains-pivot/main/wheel/hand line	\$1/drain
Rebuilt or new w/l leveler	\$.75/leveler
Cut and pipe press repair	\$10/section
Irrigation pump and system efficiency test	Free

Irrigation Pump Testing

An ultrasonic flow meter is used to measure flow in gallons per minute. The discharge pressure is recorded, and the pumping water level is measured using a sounder or water-level indicator. Electrical input is recorded or measured off the electric meter to calculate kilowatt demand and converted to electrical horsepower.

These findings are used to determine the operating efficiency of the pumping plant. It also can be used to determine if the pumping plant needs repair.

Residential Incentives

Residential incentives include efficiency upgrades such as windows, insulation, ductless heat pumps, and Energy Star-rated clothes washers and dryers.

Contact SVE for more information.
